

## MODULE HANDBOOK

Course: Clinical Co-assistance of Reproduction

Academic Year: 2017/2018

### A. Course Identity

Modul name	Clinical Co-assistance of Reproduction
Level modul	Bachelor
Abbreviation, if applicable	-
Sub-Heading, if applicable	-
Courses included in the module, if applicable	-
Semester/ Term	1/2
Module Coordinator	Erif Maha Nugraha Setyawan, DVM, MS, PhD
Lecturer(s)	Surya Agus Prihatno, DVM, MS, PhD Sri Gustari, DVM, MS Asmarani Kusumawati, DVM, MS, PhD Aris Junaidi, DVM, PhD Agung Budiyanto, DVM, MS, PhD Erif Maha Nugraha Setyawan, DVM, MS, PhD
Language	Bahasa Indonesia
Classifications within the curriculum	Compulsory rotation
Teaching Format/ class hours per weeks during the semester	1 <sup>st</sup> – 3 <sup>rd</sup> weeks: Focus group discussion (FGD), lecture, practice on rectal exploration, practice on ultrasound, practice on bull management, semen collection, sperm processing and evaluation 4 <sup>rd</sup> -6 <sup>th</sup> weeks: Field work, practice in Prof Soeparwi Animal Hospital 7 <sup>th</sup> weeks: Group seminar, individual seminar/examination 8 <sup>th</sup> week: Transition to the next rotation
Workload	1. conducting pregnancy diagnosis via rectal exploration (66 hours) 2. performing an examination of Female Reproductive System (54 hours) 3. performing Clinical Andrology Examination and Treatment (12 hours) 4. conducting Artificial Insemination (16 hours) 5. observing and handling births up to neonatal care (26 hours) 6. conducting Inspection and Handling of Reproductive Cases (52 hours) 7. conducting Quality Inspection of semen (16 hours)

	8. treating infertility (22 hours) 9. performing reproductive examinations using ultrasound (36 hours) 10. synchronizing oestrus and MOET (12 hours) 11. conducting surveillance and prevention of reproductive disease (25 hours)  total 337 hours/ semester Equal with 13.48 ECTS			
Credit points	6			
Learning goals/ competencies	CO1 able to explain the individual and population reproductive problems including pregnancy, reproductive disease, reproductive disorder and assisted reproductive technology. CO2 able to conduct the clinical and laboratory diagnosis; pathological and epidemiological diseases of animals; preparation of nutrition for health and medical disorders; pregnancy examination; reproductive disorder treatment; and application of reproductive technology. CO3 able to identify; overcome; and control the individual/population reproductive problems.			
Content	1. Introduction 2. Pregnancy diagnosis 3. Examination of Female Reproduction System 4. Clinical Andrology Examination and Treatment 5. Artificial insemination 6. Observation and birth control to neonatal care 7. Inspection and Handling of Reproductive Cases 8. Quality Inspection of Cement 9. Problem solving of Infertility and sterility 10. Reproductive examination using ultrasound 11. Estrus synchronization and embryo transfer 12. Surveillance and prevention of reproductive diseases			
Study/ examination achievement	<b>Final Examination</b>			
	<b>Assessment aspect</b>	<b>Assessment element</b>	<b>Percentage</b>	<b>Course outcome (CO)</b>
	Kognitive	Pre-test; Post-test; Supervisor exam.	30%	CO1, CO2, CO3
	Psychomotor	Rectal exploration Field practice	40%	CO2
	Affective	Individual seminar Group seminar	30%	CO1, CO3
A student's competency is determined by index of final grade as follow: <ul style="list-style-type: none"> <li>• A equal to 4.0 (four point zero)</li> </ul>				

	<ul style="list-style-type: none"> <li>• A- equal to 3.75 (three point seven five)</li> <li>• A/B equal to 3.5 (three point five)</li> <li>• B+ equal to 3.25 (three point two and five)</li> <li>• B equal to 3.0 (three point zero)</li> <li>• B- equal to 2.75 (two point seven five)</li> <li>• B/C equal to 2.5 (two point five)</li> <li>• C+ equal to 2.25 (two point two and five)</li> <li>• C equal to 2.0 (two point zero)</li> <li>• C- equal to 1.75 (one point seven five)</li> <li>• C/D equal to 1.5 (one point five)</li> <li>• D+ equal to 1.25 (one point two five)</li> <li>• D equal to 1.0 (one point zero)</li> <li>• E equal to 0 (zero)</li> </ul>
